LARIDENT

MADE IN ITALY
SINCE 1985

G43

Small retainer box (for bite) with ventilation holes various colours, with hole for cord, 8,4x8,3 cm, h 2,5 cm.

F68 MOUTHWASH

Mouthwash with 0.20% Chlorhexidine. Chlorhexidine is the chosen active ingredient for sanitizing and avoiding bacterial proliferation in the mouth and it destroys plaque, acting positively where gum and periodontal problems occur, the 0.20% chlorhexidine concentration is particularly suitable for intense anti-plaque treatment: in particular before and after any dental treatment, problems with periodontal diseases and/or gum disease and finally for who wears prosthesis and dental braces.

Contains the new **SPDD®** system, to prevent dental dyschromia (discoloration).

MEL-TRAY

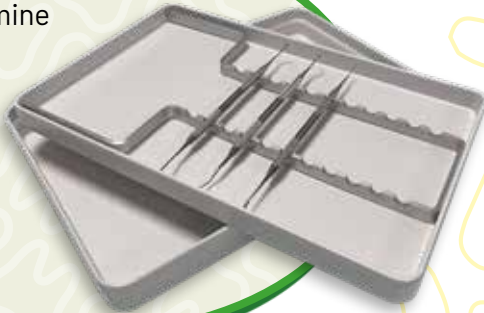

Tray made of melamine, 28x18 cm, with molded spaces for instruments, trays and mixing wells sterilizable at 121° - white colour, 1 pc.

MEL-16

Tray made of melamine cm 28,4x18,3x1,7.

MEL-16.1

Melamine cover for tray MEL-16.

MEL-52

Medium melamine tray container with sloping sides, cm 20.7 x 14.4, perfect support for disposable tray code C52.

MEL-14

Small melamine tray, with raised edges, cm 23 x 12 (internal base cm 19.5 x 9.5). Ideal container for dental instruments or support for disposable trays.

MEL-15

Big melamine tray with raised edges, cm 24 x 16.2 (internal base cm 19.5 x 12.5). Ideal container for dental instruments or support for disposable trays.

MEL-CUP

Melamine beaker, 166 ml capacity, white colour, 121° sterilizable, 1 pc.

STERILIZABLE 121°C!

BIO-PAD

Completely BIO paper, plant-based polythene pad. The paper sheet colour is white. Size 7x8 cm. Consisting of 100 sheets of paper 0.10 mm thick. Non-slip base with special paint, not plastic. Single pcs.

BIO-COLOUR CUP

BIO coloured cups in Mater-Bi, capacity 200 ml. Pack of 600 pcs, divided into 30 stacks of 20 pcs each.

BIO-SPONGE

BIO sponges for cleaning endodontic instruments.

BIO SPONGE-C90

Endodontic BIO sponges, 50 pcs.
Ø cm 5 h0,5.

BIO SPONGE-C92

Endodontic BIO sponges, 25 pcs.
Ø cm 5 h1.

BIO-BOX G46

Bite box made of BIO plastic. 7,8x7,7 h3 cm. Terralene 75%, mineral charge 25%. Carton 10 pcs.

BIO-BOX G3

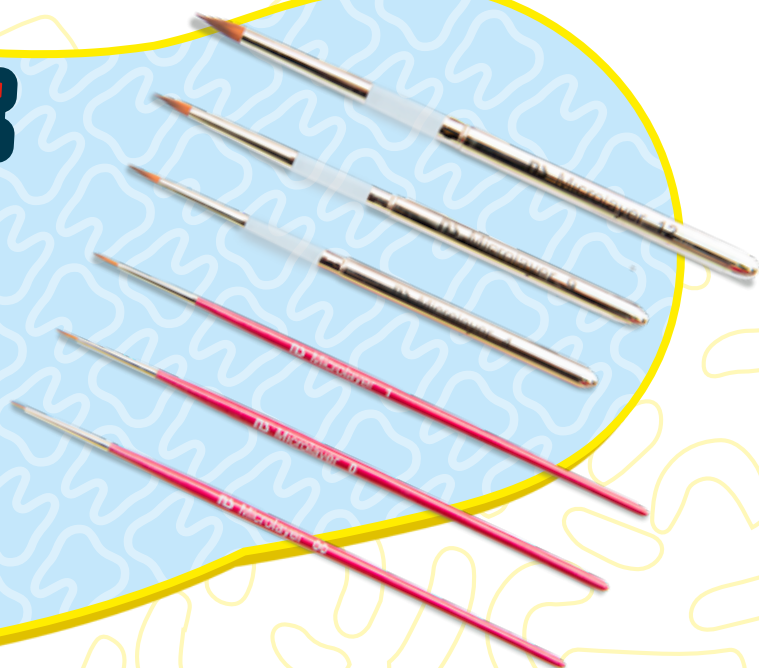

Ortho box made of BIO plastic. 8x7 h4 cm. Terralene 75%, mineral charge 25%. Carton 10 pcs.

NANO SINT BRUSHES RANGE

Microlayer

- Nanosint Microlayer brushes are specially made for the new techniques of micro layering and colouring on zirconium teeth to be finished.
- They are produced in Italy with new generation very thin synthetic bristles, which make them very similar to the kolinsky martens.
- The main advantage is the resistance of the tip, which does not curl due to wear and tear and keeps its quality for a long time.
- Regarding the 3 larger models, PL-4 PL-9 PL-12, the reversible aluminum handle lets the soaked tip be put inside in order to maintain the correct humidity and be used as a cover.

PL-00

Ultra thin for interdental and proximal nano staining and the handle in red wood - bristles length is 6 mm. Base thickness is 0.3 mm.

PL-0

Extra thin for micro colouring with a red wooden handle - bristle length is 8 mm. Base thickness is 0.6 mm.

PL-1

Thin to colour with a red wooden handle - bristle length is 10 mm. Base thickness is 1 mm.

PL-4

Medium for micro layering and colouring, reversible aluminum handle - bristle length is 12 mm. Thickness at the base is 2.5 mm.

PL-9

Medium-large compact form for dense masses or traditional ceramic with reversible aluminum handle - bristle length is 13 mm. Base thickness is 4 mm.

PL-12

Big compact form for dense masses and traditional ceramic with a reversible aluminum handle - bristle length is 16 mm. Base thickness is 5 mm.

PL-KIT

KIT of 6 Nano sint Microlayer brushes.
